EDUCATION

New England Institute of Technology, East Greenwich, RI

Bachelor of Science degree - Game Development and Simulation Programming – June 2018

Accomplishments: GPA: 3.37, Earned the Dean's List 8 times

Senior Project: Collaborated with a team of 3 (including myself) to create a 2D dungeon-crawler roleplaying game, named A Demon's Quest. I served as the Lead Programmer for the project. The engine itself was a personal project I had developed myself beforehand, and was altered to fit the requirements of the project. It utilized a custom-built level design program and was modified to load all data from XML documents, maximizing its modularity for ease-of-development by my fellow teammates.
